

Santa Rosa Clean Community Systems Wish List

As with any non-profit in this day and time, there is very little that we would turn down. As to what we need specifically: our eyes are all strained because the monitors on our computers are so old, so computer monitors or whole new computers would be great. We pretty much make do with chairs and tables for meetings, getting old school board things, etc, so new chairs and tables for meetings (new to us anyway). Office supplies (ink cartridges, paper, etc) are always needed. We also do a lot of outdoor activities through our Green-Up program and are always in need of garden related materials, lumber, screws, nails, hoses: as I said anything garden related. The list really goes on and on. We aren't complaining and we have learned to make do. As I said before, the list of what we wouldn't take would be much shorter than what we would take.
