

UWF Wish List

- Gas engine golf cart for conducting campus tours for prospective Biology and Health Sciences students and for delivering documents and books around campus.
- A four-wheeled platform winch from StepRider with a 750 lb capacity for moving heavy scientific equipment around the building and heavy deliveries at our loading dock.
- A large passenger van for conducting field trips for science courses.
- A four-wheel drive Suburban for pulling boats and passengers on scientific collection and course field trips along the Fl coast.
- 6 laptop computers as a platform for conducting laboratory exercises in physiology using newly purchased BioPac systems which allow the conduct of experiments in physiology without using live animals.
